- Clean Harbors is near completion of the new cell – plan on being in use near the end of October.
- In the new cell, there will be a tipping pad – trucks will drive in on rig mats.
- The air monitoring stations are up. They are having trouble with the computer on the one at the facility, but the one at the school is working well.
- The Open House in June was very successful – they had a good turn-out.
- Bathgate waterline will be receiving their second instalment of funding. The study for the waterline has gone ahead. Clean Harbors is giving \$30,000 every three months for a total of 50% of the project. The money is given through the county.
- Installed rig mats on landfill.
